Econometrics is the application of statistical methods to economic data in order to give empirical content to economic relationships. More precisely, it is "the quantitative analysis of actual economic phenomena based on the concurrent development of theory and observation, related by appropriate methods of inference". An introductory economics textbook describes econometrics as allowing ...

Multikollinearität ist ein Problem der Regressionsanalyse und liegt vor, wenn zwei oder mehr erklärende Variablen eine sehr starke Korrelation miteinander haben. Zum einen wird mit zunehmender Multikollinearität das Verfahren zur Schätzung der Regressionskoeffizienten instabil und Aussagen zur Schätzung der Regressionskoeffizienten zunehmend ungenau.
